

Assignment Organization Problem Statement

Many university students don't have enough tools or knowledge on how to manage their assignments, exams, and due dates effectively.

- Time management
- Organization
- Academic planning/calendars

- Educational classes?

Who is affected?

This problem can broaden its scope to high school students as well, but it is prevalent that it can become a major problem in university students (specifically undergraduates).

What is the problem?

Often, students will miss deadlines or completely forget assignments due to poor planning and time management skills. Usually, it comes from lack of knowledge on proper skills, but it can also be due to laziness and lack of motivation.

Why does it matter?

Proper time management and organizational skills are essential now and in the future. This problem can unintentionally stunt students in building and developing these skills.
